Bulletin of the Seismological Station

IVIGTUT

$\varphi = 61^{\circ}12' \text{ N.}$ $\lambda = 48^{\circ}11' \text{ W.}$ $h = 20 \text{ m.}$

Lithologic foundation: Gneiss.

Instruments: WIECHERT 1000 kg. horizontal seismograph.
WIECHERT 1300 kg. vertical seismograph.

Constants (approximate values):

Component	T	v	v
N	sec.		
N	8.8	3.5	180
E	8.8	4	215
Z	5	4	195

The United States Coast and Geodetic Survey aided in the maintenance of the station during the German occupation of Denmark and published the readings of the records for December 1939 and for 1940, 1942 and 1943. It was found afterwards that the time-corrections for 1942 as given by the station were erroneous. They have now been recomputed from observations, but these were not taken daily, and there is an uncertainty of about 1 sec. in many of the corrections applied to the readings as here published.
