THE SEISMOLOGICAL BULLETIN OF

TAIWAN WEATHER BUREAU

for

January to March, 1954.

VOL. I No. 1

臺灣省氣象所

Published by Department of Seismology,
TAIWAN WEATHER BUREAU.
64, Kung Yuan Road, Taipei, Taiwan
China.

Geographical coordinates of the Seismological Station, Taiwan, China.

λ : Longitude φ : Geographical Latitude

φ' : Geocentric Latitude

$$a = \cos \varphi' \cos \lambda \quad b = \cos \varphi' \sin \lambda \quad c = \sin \varphi'$$

Station	φ (N)	λ (E)	φ'	Altitude	Subsoil	a	b	c	Seismographs
Alishan (mt.)	23.31	120.48	23.22	2406.1 m	Miocene Sandstone	- .4700	+ .7885	+ .3966	W (H. V.), O. S.
Hengchun	22.00	120.45	21.52	22.3	Alluvium	- .4745	+ .7976	+ .3724	W (H. V.), S.

Specification of instruments:-

Mass of the pendulum M (kg)

Magnification V.

Damping coefficient Σ .

Coefficient of friction $\frac{r}{T_0^2}$ (mm/sec²)

Proper period of the pendulum T₀ (sec.)

The Constants of Seismographs at Taipei for the Month of January are as follows, and those constants at the other stations are nearly the same.

Seismographs	Component	M.	V.	Σ .	$\frac{r}{T_0^2}$	T ₀
W(H) : Wiechert's horizontal seismograph	E-W	200	77	4	0.006	4.9
W(V) : Wiechert's Vertical seismograph	N-S	200	74	2	0.006	4.9
	U-D	80	75	4	0.013	4.1
P ₁ : Portable seismograph (1)	E-W	18	40	5	0.005	5.1
	N-S	18	40	4	0.005	5.0
O : Omori's horizontal seismograph	E-W	15	20	2	0.006	14.6
	N-S	15	20	2	0.009	14.9

S : Strong motion seismograph	E-W N-S U-D	2 2 1.5	2 2 2	3 4 2	0.015 0.014 0.022	3.1 3.3 2.7
P ₂ : Portable seismograph (11)	E-W N-S U-D	10 10 7.5	20 20 20	2 2 2	0.015 0.026 0.018	3.9 4.0 4.0

The present publication inserts the following explanation of the notations only in the first number hereafter.

1. Phase.

P : Normal first phase (Longitudinal waves)

pP, PP, PPP,..... : Longitudinal waves reflected at the earth's surface.

S : Normal second phase (transverse waves).

sS, SS, SSS,..... ; Transverse waves reflected at the earth's surface.

PS, PPS,..... : Waves suffered a change or changes from longitudinal to transverse oscillation, on reflection at the earth's surface.

SP, SPP,..... : Waves suffered a change or changes from transverse to longitudinal oscillation, on reflection at the earth's surface.

L : Long waves at the beginning of the surface waves.

Q : Shorter and more regular waves in the surface waves.

M : Largest motion in the surface waves.

C : Tail or end portion.

F : End of the discernible movement.

△ : Epicentral distance.

△H : Focal distance.

H : Depth of focus.

μ : Micron.

P-S : Duration of Preliminary tremor.

2. Nature of the motion.

i : Sudden commencement of a phase.

e : Gradual or indistinct commencement of a phase.

? : Questionable or uncertain.

3. Period and Initial motion.

T : Period, duration of one complete oscillation.

I : Amplitude of the true displacement of the ground from the position at rest.

In : N-S component of I.

Ie : E-W component of I.

Iz : Vertical component of I.

Displacement to the north, east and upward are regarded as positive.

4. Scales of seismic intensity.

The intensity of the shock is estimated according to the scales O-VI, as follows :
 O, No feeling : Shocks too weak to cause human feelings, registered only by seismographs.

I, Slight : Extremely feeble shocks only felt by persons at rest or by those who are observant to an earthquake.

II, Weak : Shocks felt by most persons, slight shaking of doors and latticed sliding doors,

III, Rather strong : Slight shaking of houses and buildings, rattling of doors and latticed sliding doors, swinging of hanging objects like the electric lamps, moving of liquids in vessels.

IV, Strong : Strong shaking of houses and buildings, overturning of unstable objects, spilling of liquids out of vessels.

V, Very Strong : Cracks in the walls, overturning of gravestones, stone lanterns etc., damaging of chimneys and mud-and-plaster warehouses.

VI, Disastrous : Demolition of houses landslips, fissures on the roads, the ground etc.

	No Feeling	Slight	Weak	Rather Strong	Strong	Very Strong	Disastrous
Scale	O	I	II	III	IV	V	VI
Acceleration (gal)	0.25-0.8	0.8-2.5	2.5-8	8-25	25-80	80-250	250<

5. The magnitude of an earthquake is classified according to the radius of the felt area assumed, roughly to be a circle as follows : -

(r) Remarkable earthquake : The radius of the felt area is greater than 300 kms.

(m) Moderate earthquake : The radius is smaller than 300 kms but greater than 200 kms.

(s) Earthquake of small felt area : The radius is smaller than 200 kms but greater than 100 kms.

(l) Local earthquake : The radius is smaller than 100 kms.

(d) Distant earthquake : The epicentral distance is greater than 300 kms from the coast of Taiwan.

6. The depth of hypocenter is as a rule expressed in terms of kilometers. If it is not determined so definitely, the following scale will be adopted.

Class	Very shallow	Shallow	Rather deep	Deep
Depth	0~30 km.	30~100 km	100~200 km	>200 km

7. Geographical coordinates :

λ : Longitude (E)

φ ; Latitude (N)

The coordinates are been expressed in degrees with one place of decimal.

8. Time

Time is referred to Greenwich Mean Time (G. M. T.)

GENERAL ASPECT OF EARTHQUAKES

January to March, 1954.

1) In January, the number of earthquakes was recorded forty-six occasions which five of them were classified as felt earthquakes and the rest is the unfelt ones. The number of major earthquakes showed a decrease in comparison to the previous month.

A small felt area earthquake was happened on 16th of January. Its epicenter was located at the east of Ta-nan-Hou and the depth was estimated at 20 kms. The intensity of this shallow earthquake was reported Seismic Scale III. and was classified as a small felt area.

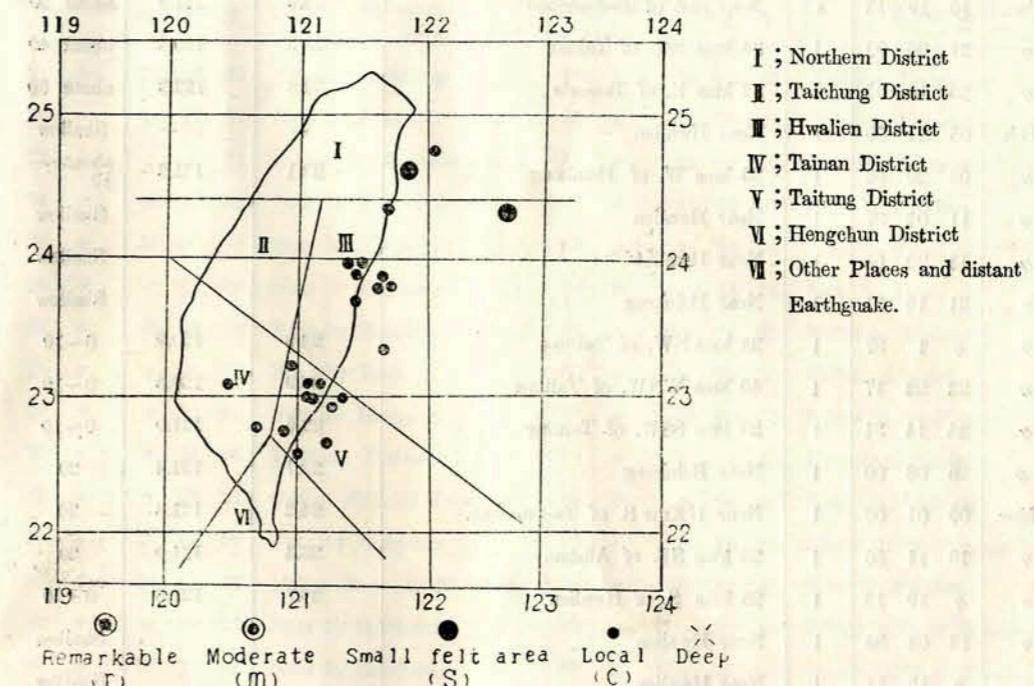

The local earthquakes occurred in January, was four. Two of them were reported in the district of Taitung, one in Tainan and the other in the northern district. Only one distant earthquake was reported in the Pacific at 430 kms. east of Taitung.

2) In February, the number of occurrence of earthquakes has an increase in comparison to the month of January and was amounted up to a figure of seventy. Among them, nine were classified as felt earthquakes and the remain were unfelt ones. All of the felt earthquakes in this month were local earthquakes.

Three felt earthquakes were reported near the vicinity of Hwalian. Their intensity were reported Seismic Scale I. Two occurred near Hsinkong. Its intensity was classified two cases under Scale II and one case under Scale I. Another four felt earthquakes occurred in the mountains near Taitung. Their intensity was reported under Scale III. Unfelt earthquakes occurred in the sea to the east of Taiwan were many. The distant earthquakes were recorded by the seismographs in this Bureau, one was at 1334 kms. northwest of Saipan and another in Kansu over the mainland with its after shock three times.

3) In March, the number of occurrence of earthquakes was amounted up to a figure of sixty-nine and has a decrease in comparison to the month of February. Among them, ten were classified as felt earthquakes and the remain were unfelt ones. Most of the felt earthquakes in this month were local earthquakes, but only one was classified as small-felt area earthquake. Seven felt earthquakes were occurred at Hwalian district. The maximum intensity was reported Seismic Scale II. Three felt earthquakes occurred in Taitung district, the maximum intensity was reported scale I. Most of the earthquakes during this month happened under the sea to the east of Taiwan. Four distant earthquakes were recorded by theseismographs in our Bureau. The first was occurred under the sea to the northeast of New Guinea. Another was at the east part of Pakistan. The third was located at 70 kilometers to southeast of Taitung and the epicenter of another one was uncertain.

Epicenters of Felt Earthquakes in January to March, 1954.

Number of earthquakes classified according to its magnitudes and districts January to March, 1954.

Districts	Classification magnitudes	number of felt earthquakes					number of Unfelt earthquakes	Total
		Remarkable	moderate	Small felt area	Local	Total

中華民國四十三年四、五、六月

THE SEISMOLOGICAL BULLETIN OF TAIWAN WEATHER BUREAU

for
April to June, 1954.
VOL. I No. 2

臺灣省氣象所

Published by Department of Seismology,
TAIWAN WEATHER BUREAU,
64. Kung Yuan Road, Taipei, Taiwan
China.

GENERAL ASPECT OF EARTHQUAKES

April to June 1954.

4) In April, the number of occurrence of earthquakes was amounted up to a figure of seventy and closes to the number in the month of March. Among them, eight were classified as felt earthquakes and the remains were unfelt ones. Most of the felt earthquakes in this month were local earthquakes, but among them, two were classified as small felt area earthquakes. Among these felt earthquakes, four were occurred at Hwalien district, three at Taitung district, and the last one was occurred at Northern district. Two small felt area earthquakes were happened on 5th and 12th of April. One of those epicenters was located at the 62 kms. to east of Ilan and the other at 70 kms. to east-northeast of Hwalien.

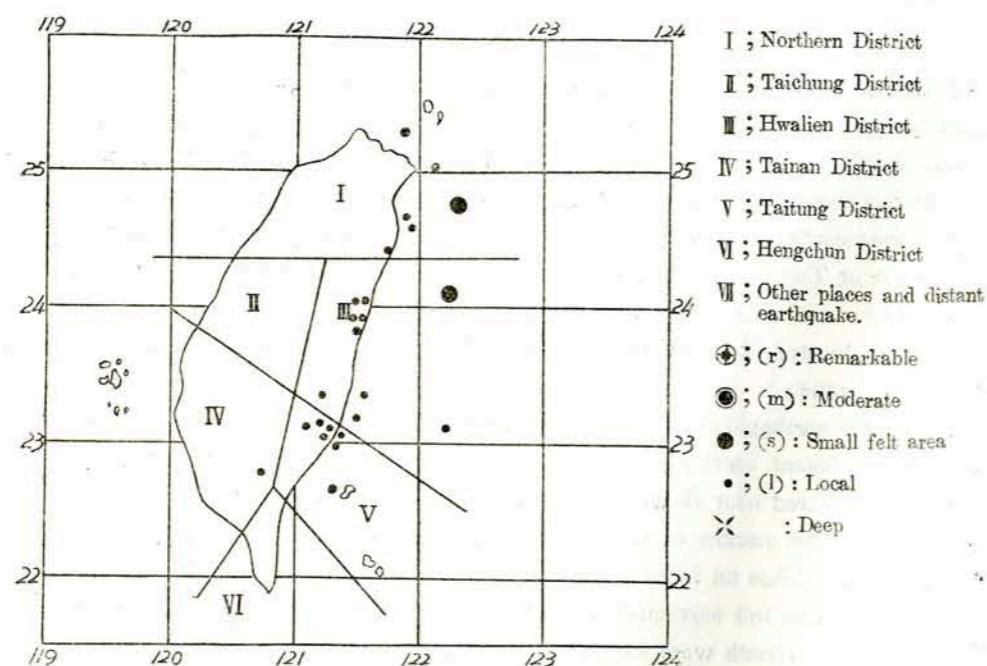

Most of the earthquakes during this month occurred under the sea to the east of Taiwan. Three distant earthquakes were recorded by the seismographs in this institute. The first was occurred near Hawaiian Is. and the others were uncertain.

5) In May, the number of occurrence of earthquakes was amounted up to a figure of eighty-seven and has an increase in comparison to the month of April. Among them, six were classified as felt earthquakes and the remains were unfelt ones. All of the felt earthquakes in this month were local earthquakes. Among these felt earthquakes, three were occurred at Hwalien, two at Taitung, and the last one was occurred at Northern district. Seven distant earthquakes were recorded by the seismographs in this institute. The first was at 9500 kms. from Taipei.

Another was located at 340 kms. to northwest of Taipei. The third was located at 510 kms. to southeast of Hengchun. The next was at the vicinity of Ogasawara Is., Jaqan. The fifth was located at 315 kms. to east of Ilan. The sixth was located near Yap Is. and the last one was happened at 600 kms. to southwest of Nansha Is.

6) In June, the number of occurrence of earthquakes was eighty-nine and increased two cases more than the month of May. Among them, ten were classified as felt earthquakes and the remains were unfelt ones. The felt earthquakes in this month were all local earthquakes. Among these felt earthquakes, six were occurred at Hwalien, two at Taitung, one at Tainan, and the last one was occurred in Northern district. Most of the earthquakes in this month happened under the sea to the east of Taiwan. seven distant earthquakes were recorded by the seismographs at Taiwan. The first was reported at 3350 kms. from Taiwan. Another was located at 1170 kms. to southsoutheast of Guam Is., and the third was in the sea to east of Philippines Is.. The fourth was estimated at a distance of 1800 kms. from Taiwan. The fifth was located at 2600 kms. from Hengchun. The sixth was happened near Swatow, and last one was uncertain.

Epicenters of Felt Earthquakes in April to June, 1954.

 Number of earthquakes classified according to its magnitudes
and districts April to June, 1954.

地 震 季 報

第一卷 第三號

中華民國四十三年七、八、九月

THE SEISMOLOGICAL BULLETIN OF TAIWAN WEATHER BUREAU for July to September, 1954 VOL. I No. 3

臺灣省氣象所

Published by Department of Seismology,
TAIWAN WEATHER BUREAU.
64. Kung Yuan Road, Taipei, Taiwan
China.

General Aspect of Earthquakes

July to September 1954.

7) In July the number of occurrence of earthquakes was amounted up to a figure of one hundred and four and has an increase in comparison to the month of June. Among them, nine were classified as felt earthquakes and the remains were unfelt ones. The felt earthquakes in this month, three were classified as small felt area earthquakes and the remains were local ones.

Among these felt earthquakes, six were occurred in Hwalien district, two in Taitung district, and the last was occurred in Taichung district.

Three small felt area earthquakes were happened on 1st, 3rd, and 21th of July. The epicenters of these earthquakes were located as follows: one at 76kms. SE. of Hwalien, another at 125kms ESE. of Ilan, and the third at 34kms. SE. of Hwalien.

Eleven distant earthquakes were recorded by the seismographs in this Institute. The first was occurred in the sea to E. of Legaspi, Philippines Is.. Another in the sea to SW. of Java. The third at 30kms. SE. of Tiva pref., paper reported in Japan with it's after shock at a time. The fourth was happened in Indochina. The fifth was located at upper part of yellow River in China with it's after shock three times and the remains were uncertain.

8) In August, the number of occurrence of earthquakes was eighty-five and has a decrease in comparison to the month of July. Among them, five were classified as felt earthquakes and the rest were unfelt ones.

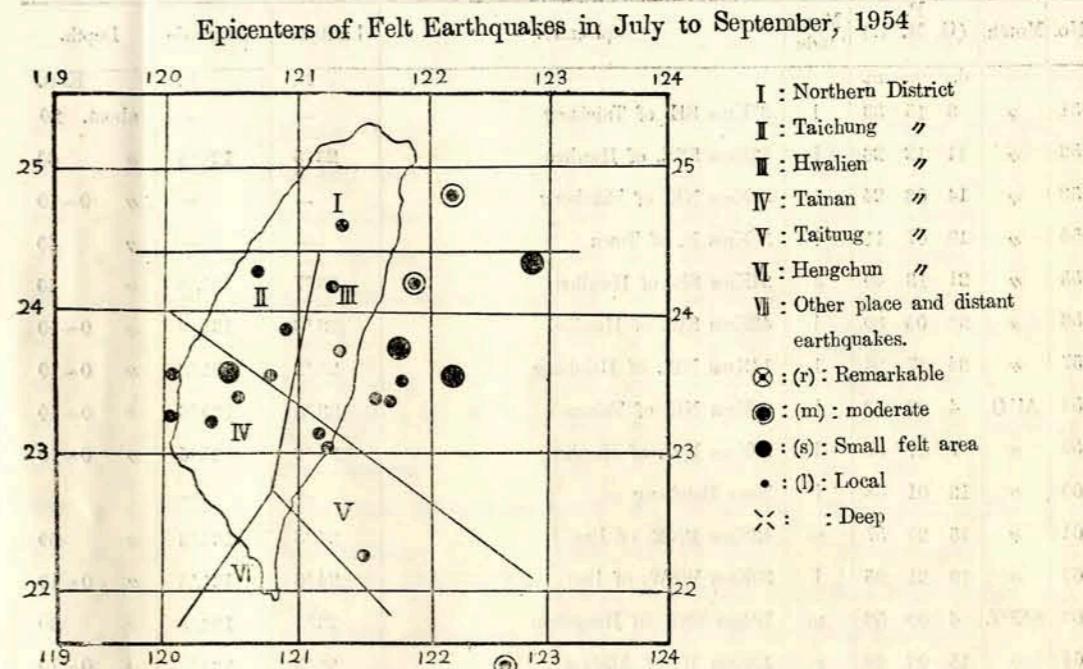

A moderate earthquake was happened on 15th of August, and it's epicenter was located at 43kms. ENE. of Ilan and the depth was estimated at about 60kms. The maximum intensity of this earthquake was reported Seismic Scale III. The local earthquakes happened in this month, was four. They were located in Northern district, another in Hwalien district. The third in Tainan district, the fourth in Taitung district.

Those distant earthquakes recorded at Taipei in the month of August, the first was on 13th, it's epicenter was located at about more than 2200kms. S. of Taiwan. Another was happened on 24th and was recorded only at Taipei but it's epicenter was uncertain. The third was happened on 27th and it's epicenter at about 240kms, SE. of Torisima Is. of Japan.

9) In September, two hundred and twelve earthquakes were recorded. Nine of them were classified as felt earthquakes and the remains are unfelt ones. The felt earthquakes in this month, two were classified as moderate earthquakes, one as

small felt area, and the remains were classified as local earthquakes. Among those felt earthquakes, two were occurred in Taichung district, two in Hwalien district, four in Tainan district, and the last one was occurred in Taitung district. Most of the earthquakes in this month happened under the sea to the SE. and S. of Taiwan. Eight distant earthquakes were recorded at Taiwan. The first was occurred on 4th, it's epicenter was reported approximately at 3460kms. to the direction of from Taiwan. Another was happened on 9th, it's epicenter was in Northern district of Alg enia in Africa but the seismogram was recorded very small at Taipei. The third occurred on 12th and it's epicenter was uncertain. The fourth was occurred on 14th and it's epicenter was at about 670kms. NE. of Taipei with it's two after shock occurred at the same date. The seventh was happened on 20th and it's epicenter was occurred at the same date. The last one was occurred on 23th and it's seismogram located around Celebes. IS.. The last one was occurred on 23th and it's seismogram was very small and was recorded only by the seismographs at Taipei.

Number of earthquakes classified according to its magnitude and districts July to September, 1954.

Number of earthquakes classified according to its magnitude and districts July to September, 1954.

地震季報

第一卷 第四號

中華民國四十三年十、十一、十二月

THE SEISMOLOGICAL BULLETIN OF TAIWAN WEATHER BUREAU

October-December, 1954.
VOL. I No. 4

臺灣省氣象所

Published by Department of Seismology,
TAIWAN WEATHER BUREAU.
No. 64. Kung Yuan Road, Taipei, Taiwan
China.

General Aspect of Earthquakes

October to December, 1954.

10) In October, the number of occurrence of earthquakes was one hundred and two and has a decrease in comparison to last month. Among them ten were classified as felt earthquakes and the remains were unfelt ones. The felt earthquakes in this month, three were classified as moderate earthquakes, two were classified as small felt area earthquakes and the remains were local ones.

Among these felt earthquakes, three were occurred in Hwalian district, two were occurred in North, Taichung and Taitung district respectively, and the last one was occurred in Hengchun district.

Three moderate earthquakes were happened on 3rd, 4th and 25th of October. The epicenters of these earthquakes were located as follows: One at 130 Km. E of Hengchun, another at 24Km. NE of Ilan, and the third at 127Km. ESE of Hengchun.

Four distant earthquakes were recorded by the seismographs of our Bureau at Taipei.

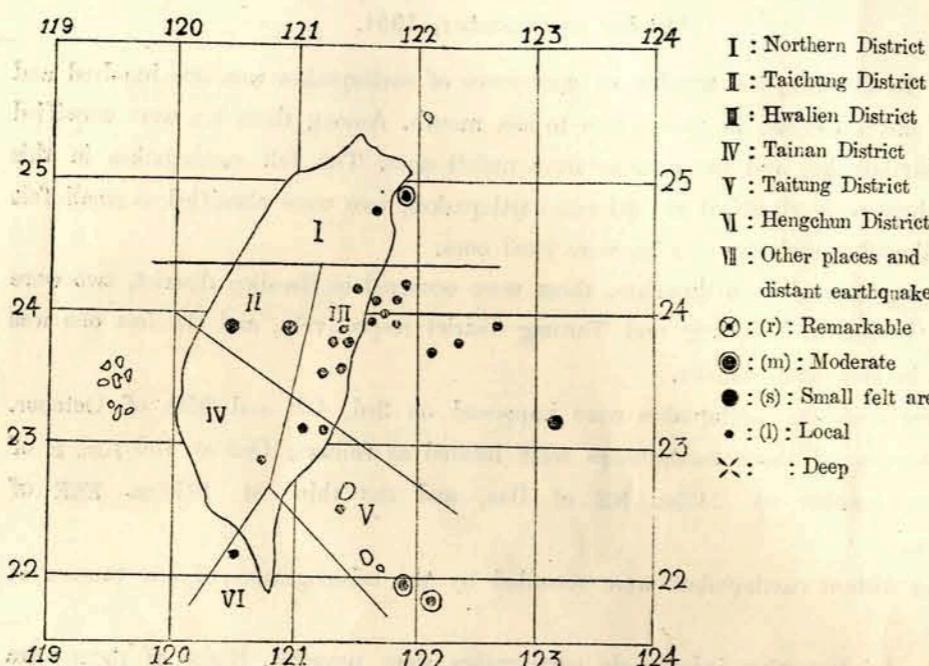

11) In November, ninety-six earthquakes were recorded. Eight of them were classified as felt earthquakes and the remains are unfelt ones. The felt earthquakes in this month, One was classified as moderate earthquakes. Among those felt earthquakes, six were occurred in Hwalian district, one in Tainan district and the last one was occurred in Taitung. Most of the earthquakes in this month happened near Hwalian.

Three distant earthquakes were recorded on this Island.

12) In December, eighty-six earthquakes were occurred in Taiwan. Among them nine were classified as felt earthquakes and the rest were unfelt ones. The felt earthquakes in this month, all of them were classified as local earthquakes. Seven of them were located in Hwalian district, another in Taitung district.

One distant earthquake was recorded on 16th of December.

Epicenters of Felt Earthquakes in October to December, 1954.

Number of earthquakes classified according to its magnitude and districts October to December, 1954.
